

Soraa opposes the selective removal of tariffs in Bills 5477, 5478, 5479, 5480, 5481, 5482, 5483 & 5484, because they seem preferential to certain LED/Lighting industry players, and could adversely affect Soraa's products & business if implemented as is. To help promote the US-based and funded research and development on Violet LED based products & subsystems and to ensure a leveled playing field, we recommend that tariffs be removed for these products & subsystems too.

Soraa, based in Fremont, California, is the world's leading developer of solid-state lighting technology built on pure gallium nitride substrates, commonly referred to as GaN on GaN™. Only Soraa uses a pure GaN crystal to create simply perfect light. Soraa's flagship product is the highest-performance LED MR16 halogen replacement lamp on the market.
